Section 1. General Provisions

Article 1. Title, category, theme

- 1.1 The International Horticultural Expo 'Expo 2022 Floriade Almere, the Netherlands' (hereinafter '**Floriade Expo 2022**'), shall be held in Almere in the Netherlands from 28 April 2022 until 23 October 2022. Floriade Expo 2022 was accredited on 1 September 2015 by the ASSOCIATION INTERNATIONALE DES PRODUCTEURS DE L'HORTICULTURE (hereinafter '**AIPH**') as an A1 international horticultural exhibition and registered in accordance with the decision resolution of the Board of Management of the AIPH. Floriade Expo 2022 is to be recognised by the BUREAU INTERNATIONAL DES EXPOSITIONS (hereinafter '**BIE**') in accordance with the BIE Convention of 22 November 1928 as amended and supplemented by the protocols of 10 May 1948, 16 November 1966, 30 November 1972, 24 June 1982 and 31 May 1988 (hereinafter '**BIE Convention**').
- 1.2 The overall theme of Floriade Expo 2022 is:

"Growing Green Cities"

with the motto

GO GREENER

Green is important in many ways. It converts CO₂ into oxygen, it purifies water and produces food, and in this way green forms the basis of human life. We use green as a natural resource for energy, medication and clothing. We enjoy recreation in the woods and parks. We visit places which, literally and figuratively, offer us air, where there is space for sport, for relaxation and encounter. Green gives us peace, inspires and fascinates us. Green is, in short, endless and diverse, and meticulously intertwined with our daily lives.

The Earth has seven billion inhabitants. More than 50% of these people now live in cities, and in 2050 this percentage will have increased to nearly 70%. As urbanisation will continue relentlessly, we have no other option than to look for ways to keep our cities safe, healthy and attractive, to look for a better balance between 'gray' and 'green'.

- 1.3 In this context, four subthemes have been developed:
- Green - Parks and green structures are creating more attractive cities;
 - Food - Solutions around food production, safety and food security;
 - Health - The contribution of green structures for a healthy living environment but also the contribution of green spaces for the physical and mental vitality of the citizens;
 - Energy - Solutions around sustainable energy but also the contribution of green spaces for a vital city.

Floriade Expo 2022 will be a stage for the international horticulture industry to showcase its innovations and its products in a professional, educational and attractive way. In close collaboration with our participants, an illustration of the Green City in every aspect (a green variant of the Cité Idéale) will be showcased. Sport, recreation, healthcare, education, art, culture and architecture will be the natural components of Floriade Expo 2022. But the stage does not have a temporary character; in parallel to the Expo, a new city district of Almere will be developed.

- 1.4 The landscape of the Expo site will be developed as a 'Green City Arboretum' serving as a model for greenstructure development in cities. This Arboretum presents in various exemplary combinations of trees, shrubs, perennials, creepers, hydrophytes and flower bulbs which can contribute to a green, healthy and sustainable city. Important criteria are biodiversity, air purification, food production and climate management of the city, as a translation of the four subthemes of Floriade Expo 2022.
- 1.5 Floriade Expo 2022 will involve partners at a local/regional, national and global level. Therefore projects will be identified in which enterprises, research institutes and governments will work together on innovations and solutions for a 'Green City'. In the development of Floriade Expo

2022, various (inter)national competitions will be initiated to stimulate innovation and to gain interest and involvement in Floriade Expo 2022 and its themes. Together we will build a green and healthy city which will serve as an example for future urban developments and share the innovations with our partners, participants and visitors.

- 1.6 In support of the theme and objectives of Floriade Expo 2022, the Official Participants are invited to nominate a city representing the Green City ideas of the participating country. Furthermore, the Official Participants are invited to join the Floriade Expo 2022 knowledge exchange program by nominating universities which are active in the field of sustainable (green) city development.
- 1.7 Further details are stipulated in Special Regulation No. 1 concerning the definition of the theme of Floriade Expo 2022 and the guidelines for the development of the theme by the Organiser and the Participants as mentioned in Article 41.

Article 2. Location

Floriade Expo 2022 will take place in new town Almere, a city in the Amsterdam Metropolitan Region and close to the city of Amsterdam and Schiphol International Airport (35 kilometers). It is the youngest city in the Netherlands. The city is only a few decades old, has almost 200.000 inhabitants and is still developing rapidly. Forty years ago, the province of Flevoland was created in a former sea (Zuiderzee). Almere became an important city in this province and has high ambitions to develop as a modern, green and sustainable city. The exhibition will cover an area of 60 ha.
